

Pricing Without Panic

A calm rate-setting framework for independents.

1. Price the outcome, not the hour, when you can.
2. Set a floor from living costs + utilization reality.
3. Offer two packages; let the middle option guide choice.
4. Revisit rates every six months or after a win streak.
5. Say the number once. Then stop talking.

Confidence is a practice. Your rate is a product decision.
